Cookies explained

Cookies are small text files that are stored on your computer by a website you visit in order to enable you to perform certain functions on the website and regulate its content to your preference. They can store data on pages which you have provided key information for (e.g. when you provide a password) but only once you are asked and you accept to the storage of this information. Cookies may be used on some pages of the site for us to provide website users with a more customized web browsing experience; they are not used to determine the personal identity of anyone merely visiting the site.

Arumcapital.eu cookies types

Session cookies

These cookies are temporary cookies as they are deleted as soon as you close your browser. Session cookies are used to retain the information you provide us with as you navigate through each section of our website.

You can choose to decline session cookies via your browser's privacy settings but please note that this may have a negative impact on your browsing experience and particularly if these are declined across all websites.

Analytical cookies

Analytical cookies may include both temporary and more persistent cookies that we use to track how you use our website and for how long. Analytical cookies do not divulge any identifying information specific to your person but they do help us improve how we provide you with our content.

Refer to your browser's privacy settings on how you can opt-out of analytical cookies.

Functional cookies

Functional cookies record and save your choices in order to provide for a more seamless experience across our website. One way functional cookies do this is by remembering your language selection each time you visit us.

Refer to your browser's urgent privacy settings on how you can opt-out of functional cookies.

Third Party cookies

These cookies are used by third parties and mostly by social media websites like Facebook, Google+, LinkedIn, Twitter, YouTube or Live chat. Third Party cookies allow us to offer you easy ways to share our content throughout your social media and also present you with the videos we post on YouTube.

Clients can disable the use of these cookies through their browser's privacy settings but this will also disable all the functions described above.

Clients may find more information about the individual cookies we use and the purpose for which we use them, in the table attached below.

Why arumcapital.eu uses cookies

Arumcapital.eu uses cookies to ensure the optimal functionality of Company's Website and cater our content to clients' personal preferences. As a regulated broker client may rest assured that any personal information collected by the Company, through any means, will not be shared with third-parties.

The Company encourage its clients to review also the **Privacy policy** for more detailed information on how arumcapital.eu uses clients' data.

Updates

The Company will perform a periodical review of this Document, at least once a year. The Document is in line with the Company's operational model, and therefore in case of any changes in the operations, these will be properly reflected in this Document.

__cfduid	The __cfduid cookie is used to override any security restrictions based on the IP address the visitor is coming from. For example, if the visitor is in a coffee shop where there are a bunch of infected machines, but the visitor's machine is known trusted, then the cookie can override the security setting. It does not correspond to any userid in the web application, nor does the cookie store any personally identifiable information. Note: This cookie is strictly necessary for site security operations and can't be turned off.	https://support.cloudflare.com/hc/en-us/articles/200170156-What-does-the-CloudFlare-cfduid-cookie-do-
_ga	Google Analytics is a simple, easy-to-use tool that helps website owners measure how users interact with website content. As a user navigates between web pages, Google Analytics provides website owners JavaScript tags (libraries) to record information about the page a user has seen, for example the URL of the page. The Google Analytics JavaScript libraries use HTTP Cookies to "remember" what a user has done on previous pages / interactions with the website.	More info
